Curriculum Vitae

David Gamarnik
Nanyang Technological University Professor of Operations Research

---

Address

MIT Sloan School of Management, E62-563
100 Main street
Cambridge, MA 02140
http://web.mit.edu/gamarnik/www/home.html
gamarnik@mit.edu
Tel:617-253-7779
Fax:617-258-7579

Research interests

Discrete probability, algorithms and optimization, statistics, machine learning and data science, quantum computing and quantum information science, stochastic processes and queueing theory.

Working Experience

2012-Present	Professor of Operations Research, Sloan School of Management, MIT.
2007-Present	Associate Professor of Operations Research, Sloan School of Management, MIT.
2005-2007	Assistant Professor of Operations Research, Sloan School of Management, MIT.
1997-2005	IBM, T.J.Watson Research Center. Department of Mathematical Sciences. Research Staff Member.

Education

1993-1998	Ph.D. in Operations Research, MIT.

1991-1993	B.A. in Mathematics, Courant Institute of Math. Sci., New York University.
1986-1991	Department of mathematics, State University of Georgia, USSR.

Honors and Awards

- Fellow of the Institute of Mathematical Statistics 2023
- Fellow of the American Mathematical Society 2021
- Fellow of Institute for Operations Research and the Management Sciences, 2021
- INFORMS Franz Edelman Prize Laureate, 2014
- INFORMS Applied Probability Society Best Publication Award, 2011
- IBM Faculty Award, 2006
- Erlang Prize for Early Career Applied Probabilists, Applied Probability Society of INFORMS, 2004
- Hollis Cooley Memorial Prize presented for exceptional promise in mathematics Courant Institute of Mathematical Sciences, 1992
- Winner of the Quant journal competition in mathematics for high school students, 1985,1986. USSR
- Winner of several high school and college olympiads in mathematics 1985-1988. USSR

Plenary Presentations and Tutorials

06/2025	Applied Probability Society of INFORMS plenary lecture.
01/2025	Ecole de Physique des Houches Towards a theory for typical-case algorithmic hardness.
07/2024	Plenary talk at Workshop on Randomness and Learning on Networks, Institute for Pure and Applied Mathematics, Rio-de-Janeiro, Brazil.
05/2024	Rejewski, Różycki, Zygalski lecture 2024, Poznan, Poland.
09/2024	Tutorial at Allerton Conference University of Illinois at Urbana-Champaign.
09/2022	9th Polish Combinatorial Conference.

04/2018	Oxford Distinguished Speaker Seminar, Department of Statistics, Oxford University.
06/2014	Summer school on Graph Limits, Groups and Stochastic Processes. Renyi Institute, Budapest, Hungary.
09/2013	Ecole de Physique des Houches summer school on Statistical physics, Optimization, Inference and Message-Passing algorithms
10/2013	Correlation Decay Method for Decision, Optimization and Inference in Large Scale Networks, TutORials in Operations Research, INFORMS, 2013.
11/2011	Markov Lecture Discussant at INFORMS 2011, Applied Probability Society.
10/2011	Tutorial lecture at Young European Queueing Theorists conference, EURANDOM, Eindhoven, Netherlands.
05/2011	Plenary lecture. 15-th International Conference on Random Structures and Algorithms, Atlanta, GA.
01/2008	Plenary lecture. 33-d Conference on the Mathematics of Operations Research, Lunteren, Netherlands. *Lecture I: Algorithmic issues and undecidability in the theory of queueing networks*, *Lecture II: Large scale queueing systems in the Quality/Efficiency driven regime and applications*,
06/2008	Plenary lecture. Sixth International Workshop on Matrix- Anlaytic Methods (MAM6), Beijing, China,

---

Past and Present Teaching Experience

- Topics in Discrete Probability
- Fundamentals of Probability
- Data Science and Big Data Analytics (Online course)
- Data, Models and Decisions
- Advanced Stochastic Processes
- Queues: Theory and Applications
- Applied Probability Seminar
- Network Science and Models

Professional Activities

- Area Editor of Mathematics of Operations Research journal in the area of Learning Theory (2023-Present)
- Area Editor of Operations Research (2011 – 2017).
- Associate Editor of Annals of Applied Probability (2007 – 2012).
- Associate Editor of Mathematics of Operations Research (2010 – 2018).
- Associate Editor of Queueing Systems: Theory and Applications (2010 – 2014).
- Associate Editor of Stochastic Systems (2010 – 2015).
- Guest editor for SIAM Journal on Discrete Mathematics Special Issue on Constraint Satisfaction Problems and Message Passing Algorithms.
- Member of the Scientific Advisory Board of Networks Program, Netherlands, (2014 – Present)
- Chair of INFORMS publication committee review for Stochastic Systems journal. (2019-2020)
- Chair of INFORMS Applied Probability Prize committee (Erlang Prize and Best Publication Award), (2016-2017).
- Member of the committee for INFORMS Lanchester Prize for the best publication in operations research and management science (2017-2018).
- Council member of Applied Probability Society of INFORMS (term 2006–2008).
- Applied Probability Cluster Chair for INFORMS 2006 conference, Pittsburgh, PA.
- Program committee:
  - Co-organizer of a workshop GRAMSIA (Graphical Models, Statistical Inference, and Algorithms 2023) at Center for Mathematical Sciences and Applications (CMSA), Harvard.
  - Conference on Learning Theory (COLT) 2019, 2024
  - ACM-SIAM Symposium on Discrete Algorithms (SODA 2015).
  - Co-organizer of a workshop GRAMSIA (Graphical Models, Statistical Inference, and Algorithms 2015) at Institute for Mathematics and its Applications (IMA), University of Minnesota.

- Co-organizer of a workshop Mathematical Challenges in Graphical Models and Message-Passing Algorithms at Institute for Pure and Applied Mathematics (IPAM), UCLA, 2012.
- 27th Annual ACM SIGACT-SIGOPS Symposium on Principles of Distributed Computing (PODC 2008).
- ACM International Conference on Measurement and Modeling of Computer Systems (SIGMETRICS) 2010.
- INFORMS Applied Probability Conference, 2005, 2009, 2011.
- 7-th International Conference on Matrix-Anlaytic Methods (MAM7), New York, NY,
- Mathematical Performance Modeling and Analysis 2001, 2003-2013.

Grants

- NSF Grant CISE 2233897 2023-2026
- NSF Grant DMS-2015517 2020-2023
- ONR Grant N00014-17-1-2790
- NSF Grant CMMI-024078-002 2015-2018
- NSF Grant CMMI-1335155, 2013-2016
- NSF Grant CMMI-1031332, 2010-2013
- NSF Grant CMMI-0726733, 2007-2009
- NSF Grant DMS-0732175, 2007-2009
- Brigham and Women's Hospital-MIT Project on Scheduling First responders 2008-2010
- Buchsbaum Grant, 2006

Visiting positions

02/2025-05/2025 MSRI Probability and Statistics of Discrete Structures (Scheduled for 2025)

08/2022-12/2023 Simons Institute for the Theory of Computing. Graph Limits and Processes on Networks: From Epidemics to Misinformation

08/2021-12/2022 Simons Institute for the Theory of Computing. Computational Complexity of Statistical Inference Program

08/2020-12/2020 Simons Institute for the Theory of Computing. Probability, Geometry, and Computation in High Dimensions

08/2018-06/2019	Harvard University, Center for Mathematical Sciences and Applications, MA. (Sabbatical leave)
01/2018	Simons Institute, Berkeley, CA.
04/2015	Simons Institute, Berkeley, CA.
04/2014	Microsoft Research Lab, New England.
01-05/2012	Microsoft Research Lab, New England.
09-12/2011	Brown University, Division of Applied Mathematics.
05/2010	Microsoft Research Lab, Redmond.
03-04/2010	Newton Institute of Mathematical Sciences, Cambridge, UK.
07/2009	Los Alamos National Laboratory.
07/2009	University of Berkeley.
01/2009	Tata Institute for Fundamental Research. Mumbai.
08/2008	Google Research. New York.
07/2008	Los Alamos National Laboratory.
03/2008	Indian Statistical Institute in Delhi.
06/2007	Microsoft Research Lab. Redmond
05/2007	Swiss Federal Institute of Technology (ETH).
05/2007	Georgia Institute of Technology.
10/2005	Microsoft Research Lab, Redmond.
04/2005	EURANDOM (European research institute for the study of stochastic phenomena), Eindhoven, Netherlands.
04/2005	Department of Mathematics and Mathematical Statistics, Chalmers University, Sweden.
03/2005	Department of Mathematical Sciences, Carnegie Mellon University.

Publications

Books

1. D. Bertsimas and D. Gamarnik. *Queueing Theory: Classical and Modern Methods*. Dynamic Ideas, 2022.

2. Chapter in the book *Spin Glass Theory and Far Beyond: Replica Symmetry Breaking after 40 Years*. Edited by Patrick Charbonneau, Enzo Marinari, Giorgio Parisi, Federico Ricci-tersenghi, Gabriele Sicuro, Francesco Zamponi, and Marc Mezard. World Scientific, 2023.

Surveys and Tutorials

1. David Gamarnik. Turing in the shadows of Nobel and Abel: an algorithmic story behind two recent prizes. *AMS Notices, to appear in May issue 2025*,

2. David Gamarnik, Cristopher Moore, and Lenka Zdeborová. Disordered systems insights on computational hardness. *Journal of Statistical Mechanics: Theory and Experiment*, 2022(11):114015, 2022.

3. David Gamarnik. The overlap gap property: A topological barrier to optimizing over random structures. *Proceedings of the National Academy of Sciences*, 118(41), 2021.

4. D. Gamarnik. Correlation decay method for decision, optimization and inference in large scale networks. *TutORials in Operations Research*, 2013.

5. David Gamarnik. Fluid models of queueing networks. *Wiley Encyclopedia of Operations Research and Management Science*, 2010.

Probability, Random Graphs and Algorithms

1. David Gamarnik and Devin Smedira. Integrating high-dimensional functions deterministically. *arXiv preprint arXiv:2402.08232*, 2024.

2. Ahmed El Alaoui and David Gamarnik. Hardness of sampling solutions from the symmetric binary perceptron. *arXiv preprint arXiv:2407.16627*, 2024.

3. David Gamarnik, Bobak T Kiani, and Alexander Zlokapa. Slow mixing of quantum gibbs samplers. *arXiv preprint arXiv:2411.04300*, 2024.

4. Eric R Anschuetz, David Gamarnik, and Bobak Kiani. Combinatorial nlts from the overlap gap property. *Quantum*, 8:1527, 2024.

5. Houssam El Cheairi and David Gamarnik. Algorithmic universality, low-degree polynomials, and max-cut in sparse random graphs. *arXiv preprint arXiv:2412.18014*, 2024.

6. David Gamarnik, Mihyun Kang, and Paweł Prałat. Cliques, chromatic number, and independent sets in the semi-random process. *SIAM Journal on Discrete Mathematics*, 38(3):2312–2334, 2024.

7. David Gamarnik and Ilias Zadik. The landscape of the planted clique problem: Dense subgraphs and the overlap gap property. *The Annals of Applied Probability*, 34(4):3375–3434, 2024.

8. David Gamarnik, Aukosh Jagannath, and Alexander S Wein. Hardness of random optimization problems for boolean circuits, low-degree polynomials, and langevin dynamics. *SIAM Journal on Computing*, 53(1):1–46, 2024.

9. David Gamarnik, Eren C Kızıldağ, and Ilias Zadik. Stationary points of a shallow neural network with quadratic activations and the global optimality of the gradient descent algorithm. *Mathematics of Operations Research*, 2024.

10. David Gamarnik, Elchanan Mossel, and Ilias Zadik. Sharp thresholds imply circuit lower bounds: from random 2-sat to planted clique. *arXiv preprint arXiv:2311.04204*, 2023.

11. David Gamarnik. Barriers for the performance of graph neural networks (gnn) in discrete random structures. *Proceedings of the National Academy of Sciences*, 120(46):e2314092120, 2023.

12. David Gamarnik and Devin Smedira. Computing the volume of a restricted independent set polytope deterministically. *arXiv preprint arXiv:2312.03906*, 2023.

13. David Gamarnik, Aukosh Jagannath, and Eren C Kızıldağ. Shattering in the ising pure p-spin model. *arXiv preprint arXiv:2307.07461*, 2023.

14. Yatin Dandi, David Gamarnik, and Lenka Zdeborová. Maximally-stable local optima in random graphs and spin glasses: Phase transitions and universality. *arXiv preprint arXiv:2305.03591*, 2023.

10/2000	*On deciding stability of scheduling policies in queueing systems*, Dept. of Math Sciences, T.J.Watson Research Center, IBM.
02/2000	*On Deciding Stability of Scheduling Policies in Queueing Systems*, MIT, Operations Research Center.
01/1999	*Stability of Adversarial Queues via Fluid Models*, Bell Labs.

12/1998 *Stability of Adversarial Queues via Fluid Models*, Systems Design, Analysis & Theory seminar. T.J.Watson Research Center, IBM.

01/1998 *Performance Analysis of Multiclass Queueing Networks*, Dept. of Math Sciences, T.J.Watson Research Center, IBM.

Invited and Refereed Conference and Workshop Presentations

01/2025 *Geometric Barriers to Classical and Quantum Computing in Random Structures.* Towards a theory for typical-case algorithmic hardness, Les Houches Physics School, France

09/2024 *Overlap Gap Property: A topological barrier to optimizing over classical and quantum random structures* Tutorial at Allerton Conference University of Illinois at Urbana-Champaign.

07/2024 *Overlap gap property: An algorithmic barrier to optimization in random structures and statistical physics.* Plenary talk at Workshop on Randomness and Learning on Networks, Institute for Pure and Applied Mathematics, Rio-de-Janeiro, Brazil.

06/2024 *A curious case of the symmetric binary perceptron model. Algorithms and algorithmic barriers.* DIMACS Workshop on Modeling Randomness in Neural Network Training: Mathematical, Statistical, and Numerical Guarantees, Rutgers University, NJ.

04/2024 *Optimizing p-spin glass model for large p* American Mathematical Society Sectional Meeting, University of San Francisco.

03/2024 *A curious case of the symmetric binary perceptron model. Algorithms and algorithmic barriers.* Conference on Information Sciences and Systems, Princeton University, NJ.

02/2024 *From Sparse Random Graphs to Mean-field Models and Back.* Computational Complexity of Statistical Inference workshop at Banff International Research Station. Alberta, Canada.

10/2023 *Overlap Gap Property: algorithmic fruits of the theory of spin glasses* Solvay Institute Conference on Physics (Congrès Solvay) 2023, Belgium

08/2023 *Combinatorial NLTS from random K-SAT and its properties* Statistical Physics meets Machine Learning Conference, Cargese, France.

06/2023 *Combinatorial NLTS from random K-SAT and its properties* Foundations of Data Science Institute (FODSI) conference, MIT, MA.

06/2023 *Overlap gap property: A topological barrier to optimizing over random structures* University of Texas Austin graduate mini-school, TX.

12/2022 *Quantum Algorithms with Shallow Depth. Probabilistic Properties and Algorithmic Barriers* Algorithmic Complexity of Statistical Inference program reunion workshop, Simons Institute for the Theory of Computing, UC Berkeley, CA.

09/2022 *Overlap gap property: A geometric barrier to optimization in random graphs.* 9th Polish Conference on Combinatorics, Bedlevo, Poland.

08/2022 *Overlap gap property: A topological barrier to optimizing over random structures* Plenary presentation at the XII Conference of Georgian Mathematical Union, Batumi, Georgia.

05/2022 *Overlap gap property: A topological barrier to optimizing over random structures* Mathematics of Large Networks Workshop, Budapest, Hungary.

04/2022 *Improved lower bounds on the depth of polynomial size Boolean circuits for the independent set problem.* Oberwolfach workshop on Combinatorics, Probability and Computing, Obwerwolfach, Germany.

10/2021 *A curious case of symmetric binary perceptron model. Algorithms and barriers.* Workshop on Algorithmic Advances for Statistical Inference with Combinatorial Structure, Simons Institute for the Theory of Computing, UC Berkeley, CA.

10/2021 *High-dimensional statistics, algorithms, and algorithmic intractability* Tutorial at the Applied Probability Cluster, INFORMS 2021 Annual Meeting, Anaheim, CA.

11/2020 *In Search of New Algorithmic Complexity Theory for Random Structures* Presentation at FODSI Retreat (Online).

09/2020 *Low-Degree Hardness of Random Optimization Problems* Probabilistic Combinatorics Online 2020 conference, Moscow, Russia

12/2019 *Sparse High-Dimensional Isotonic Regression* Poster Presentation at NeuRIPS, Vancouver, Canada.

09/2019 *The Landscape of the Planted Clique Problem: Dense subgraphs and the Overlap Gap Property* 57th Annual Allerton Conference on Communication, Control, and Computing, Allerton, IL.

08/2019 *Algorithmic Challenges in High-Dimensional Inference Models. Insights from Statistical Physics* Conference on BIG Data, CMSA, Harvard University, Cambridge, MA.

07/2019 *The Hidden Clique Problem. 20 years later* BennyFest conference, ETH, Zurich, Switzerland.

05/2019 *Two Algorithmic Hardness Results in Statistical Mechanics and High-Dimensional Statistics* 3d Hungarian-Russian Conference on Combinatorics, Moscow, Russia.

04/2019 *Explicit construction of RIP matrices is Ramsey-hard* Oberwolfach workshop on Combinatorics, Probability and Computing, Obwerwolfach, Germany.

09/2018 *Two Algorithmic Hardness Results in Spin Glasses and Compressive Sensing* Banff International Research Station. Conference on Spin Glasses and Related Topics. Alberta, Canada.

09/2018 *Algorithms and Algorithmic Obstacles in High-Dimensional Regression* The international workshop on Statistical Challenges in High-dimensional and Complex Data. Columbia University, NY, NY.

07/2018 *Algorithms and Algorithmic Obstacles in High-Dimensional Regression* 12th International Vilnius Conference on Probability Theory and Mathematical Statistics and 2018 IMS Annual Meeting on Probability and Statistics. Vilnius, Lithuania.

07/2018 *A LOWER BOUND ON THE QUEUEING DELAY IN RESOURCE CONSTRAINED LOAD BALANCING* Conference on Stochastic Networks, Edinburgh, UK.

06/2018 *Performance of local algorithms in random structures. Power and limitations.* Workshop on Local Algorithms (WoLA), MIT, Cambridge, MA.

05/2018 *Maximum Cut problem on sparse random hypergraphs . Structural results using the interpolation method and the algorithmic implications.* Workshop on Algorithms & Randomness, Georgia Institute of Technology, GA.

05/2018 *Algorithms and Algorithmic Obstacles in High-Dimensional Regression* 50-th Workshop on Combinatorial Statistics, Centre de Recherches Mathématiques (CRM), Montreal, CA.

04/2018 *Algorithms and Algorithmic Obstacles in High-Dimensional Regression* AMS East Sectional Spring Meeting, Boston, MA.

12/2017 *(Arguably) Hard on Average Constraint Satisfaction Problems* Oberwolfach workshop on Network Models: Structure and Function, Obwerwolfach, Germany.

Performance of local algorithms in random structures. Power and limitations.

12/2017 *(Arguably) Hard on Average Constraint Satisfaction Problems*

09/2017 *(Arguably) Hard on Average Constraint Satisfaction Problems* Conference on Randomness and Graphs. Processes and Structures, Eindhoven Technical University, Eindhoven, Netherlands

08/2017 *Uniqueness of gibbs measures for continuous hardcore models* Dagstuhl workshop on Computational Counting, Dagstuhl, Germany

04/2017 *Algorithmic Obstructions in High Dimensional Regression* Conference on Statistics and Data Sciences, IDSS, MIT, Cambridge, MA.

07/2017 *Sparse high-dimensional regression with binary coefficients* International Congress on Statistics, Marrakesh, Morocco

05/2017 *(Arguably) Hard on Average Constraint Satisfaction Problems* American Institute of Mathematics workshop on Phase transitions in randomized computational problems, San Jose, CA

01/2017 *On the limits of sequential local algorithms for random NAE-K-SAT problem* Oberwolfach workshop on Combinatorics, Obwerwolfach, Germany.

10/2016 *On Limits of Local Algorithms for Solving Random Constraint Satisfaction Problems* Workshop on Local Algorithms, Microsoft Research New England, Cambridge, MA.

5/2016 *Finding a Large Submatrix of a Random Matrix, and the Overlap Gap Property* Workshop on percolation, spin glasses and random media, Northwestern University, Evanston, IL.

4/2016 *Finding a Large Submatrix of a Gaussian Random Matrix* Oberwolfach workshop on Combinatorics and Probability, Obwerwolfach, Germany.

3/2016 *Finding a Large Submatrix of a Gaussian Random Matrix* Workshop on the Classification Program of Counting Complexity, Simons Institute, Berkeley University, Berkeley, CA.

3/2016 *(Arguably) Hard on Average Optimization Problems and the Overlap Gap Property* Workshop on Inference Problems Theme, Nexus of Information and Computation Theories, Institute of Henry Poincare, Paris, France.

01/2016 *(Arguably) Hard on Average Optimization Problems and the Overlap Gap Property* Conference on Physics Informed Machine Learning, Santa Fe, NM.

10/2015 *On the Resource/Performance Tradeoff in Large Scale Queueing Systems* Institute of Mathematics and Applications Annual Program Year Workshop Analysis and Control of Network Dynamics, IMA, Minnesota, MN.

07/2015 *Large Average Submatrix Detection in Gaussian Random Matrices.* 18th INFORMS/Applied Probability Society Conference, Istanbul, Turkey.

07/2015 *Join the Shortest Queue with Many Servers The Heavy Traffic Asymptotics.* 18th INFORMS/Applied Probability Society Conference, Istanbul, Turkey.

06/2015 *Limits of local algorithms for randomly generated constraint satisfaction problems* Banff Workshop on Groups, Graphs and Stochastic Processes, Banff, Canada.

03/2015 *Power and Limits of Local Algorithms in Random Combinatorial Structures* Workshop on Probability Theory and Combinatorial Optimization in honor of J. Michael Steele, Duke University, NC.

08/2014 *Limits of local algorithms for randomly generated constraint satisfaction problems.* Workshop on Spin Glasses and Related Topics. Banff Center, Canada.

06/2014 *Limits of local algorithms for random graphs*, Conference on Stochastic Networks 2014, invited presentation. University of Amsterdam, Amsterdam, Netherlands.

06/2014 *Convergent sequences of sparse graphs: A large deviations approach.* Graph limits, groups and stochastic processes workshop. Renyi Institute, Budapest, Hungary.

06/2014 *Limits of Local Algorithms for Randomly Generated Constraint Satisfaction Problems* Workshop on Extremal Graph Theory, Yandex Co, Moscow, Russia.

05/2014 *Limits of Local Algorithms for Randomly Generated Constraint Satisfaction Problems* Warwick EPSRC Symposium on Statistical Mechanics: Phase transitions in discrete structures and computational problems

03/2014 *Franz Edelman Competition Finalist Presentation. Alliance for Paired Donation.* INFORMS Conference on Business Analytics & Operations Research

01/2014 *Limits of Local Algorithms over Sparse Random Graphs* Innovation in Theoretical Computer Science, Princeton, NJ.

10/2013 *Local Algorithms for Random Networks. Lecture I: the Power of Local Algorithms. Lecture II: the Limits of Local Algorithms".* Statistical physics, Optimization, Inference and Message-Passing algorithms autumn school at Les Houches, France.

10/2013 *Limits of local algorithms for sparse random graphs.* Workshop on Random Graphs and Their Applications at Yandex Co., Moscow Russia.

06/2013 *Limits of local algorithms for sparse random graphs.* International Workshop on Statistical Learning, Moscow, Russia.

02/2013 *Power and Limitations of Local Algorithms for Network Optimization Problems.* Workshop on Asymptotics of Large-Scale Interacting Networks, Banff center, Canada.

02/2013 *Combinatorics of kidney exchanges. Perspectives from the random graph theory.* Workshop on Asymptotics of Large-Scale Interacting Networks, Banff center, Canada.

01/2013 *Hardness results for local algorithms in sparse random graphs.* Institute for Mathematics and Applications workshop on Extremal and Probabilistic Combinatorics, UCLA, Los Angeles, CA.

01/2013 *Hardness results for local algorithms in sparse random graphs.* Workshop "What is information?", University of Beer-Sheba at Sde-Boker, Israel.

12/2012 *Convergent sequences of sparse graphs: A large deviations approach* 2012 Winter Canadian Society Meeting, Montreal, CA.

07/2012 *On the uniqueness of Lebesgue measure on regular trees and the problem of computing the volume of a polytop.* 8th World Congress in Probability and Statistics, Istanbul, Turkey.

06/2012 *On the uniqueness of Lebesgue measure on regular trees and the problem of computing the volume of a polytop.* Workshop on Computation and Phase Transitions, Georgia Institute of Technology, Atlanta, GA.

02/2012 *On the uniqueness of Lebesgue measure on regular trees and the problem of computing the volume of a polytop.* Workshop on Bridging statistical physics and optimization, inference and learning, Les Houches Physics School, Le Houches, France.

11/2011 *Interpolation method and scaling limits in sparse random graphs.* Workshop on Counting, Inference and Optimization on Graphs, Princeton University, Princeton, NJ.

08/2011 *Parallel server queueing systems in the Halfin-Whitt heavy traffic regime.* 5th Conference on Limit Theorems in Probability Theory and Their Applications

07/2011 *Combinatorial Approach to the Interpolation Method and Scaling Limits in Sparse Random Graphs.* International Mathematical Conference "50 years of Institute for Problems of Information Transmission"

07/2011 *Skorokhod problem is undecidable.* 16th INFORMS/Applied Probability Society Conference, Stockholm, Sweden.

07/2011 *Interpolation method and scaling limits in sparse random graphs.* 16th INFORMS/Applied Probability Society Conference, Stockholm, Sweden.

04/2011 *Interpolation method and scaling limits in sparse random graphs.* International Conference on Probability, Statistics, and Data Analysis, Raleigh, NC.

01/2011 *Right-convergence of sparse random graphs and the interpolation method.* Oberwolfach workshop on Combinatorics, Obwerwolfach, Germany.

10/2010 *Parallel server queueing systems in the heavy traffic regime.* Oberwolfach workshop on Mathematical Challenges in Stochastic Networks, Obwerwolfach, Germany.

09/2010 *Interpolation method and scaling limits in sparse random graphs.* 34-th Conference on Stochastic Processes and Applications, Osaka, Japan.

03/2010 *A combinatorial approach to the interpolation method and scaling limits in sparse random graphs.* One-Day Meeting in Combinatorics Mathematical Institute University of Oxford, UK.

02/2010 *Statistical physics methods in combinatorial optimization, inference and graphical games.* Workshop on Frontiers of Controls, Games, and Network Science with Civilian and Military Applications, University of Texas, Austin.

10/2009 *A combinatorial approach to Guerra's interpolation method.* Probabilistic Techniques and Applications workshop at Institute for Pure and Applied Mathematics, UCLA, Los Angeles, CA.

08/2009 *Combinatorial approach to the interpolation method and scaling limits in sparse random graphs.* Physics of algorithm workshop, Santa Fe, NM.

07/2009 *Correlation Decay and Efficient Inference in Markov Random Fields*, 15th INFORMS/Applied Probability Society Conference, Cornell University, Ithaca, NY.

01/2009 *Correlation Decay and Deterministic Algorithms for Counting. Tutorial.* Tata Institute for Fundamental Research. Mumbai, India.

01/2009 *Sequential cavity method and applications to free energy computations*, Symposium on Discrete Algorithms (SODA2009). New York, NY.

10/2008 *Long-range independence and combinatorial optimization with random costs.* DIMACS Working Group on Message-Passing Algorithms. Rutgers University, NJ.

06/2008 *Applications of cavity method to combinatorial enumeration and optimization*, International Workshop on Phase Transitions, Hard

Combinatorial Problems and Message Passing Algorithms Banff International Research Center. Alberta. CA.

12/2007 *Correlation decay and applications to the problems of combinatorial enumeration and optimization.* Advances in Analysis of Monte Carlo Methods. Harvard University.

07/2007 *Steady-state analysis of a multi-server queueing system in QED regime*, 14th INFORMS/Applied Probability Society Conference, Eindhoven, Netherlands.

07/2007 *Undecidability results in the theory of queueing networks and Skorokhod problem*, 14th INFORMS/Applied Probability Society Conference, Eindhoven, Netherlands.

07/2007 *Stability and Performance Analysis of a Feedforward Type Infinite Markov Chains*, 14th INFORMS/Applied Probability Society Conference, Eindhoven, Netherlands.

07/2007 *Correlation decay and counting list-colorings of a graph.* Common concepts in Statistical Physics and Computer Science, Trieste, Italy.

05/2007 *Correlation decay, statistical physics and applications to counting problems.* "Problems at the interface of discrete mathematics and statistical physics" minisymposium at 1st Canadian Discrete and Algorithmic Mathematics Conference, Banff, Alberta, Canada.

05/2007 *Correlation decay, statistical physics and applications to counting problems.* ETH Combinatorics Day, ETH, Zurich, Switzerland.

04/2007 *Monomer-dimer model and a new deterministic approximation algorithm for computing a permanent of a 0,1 matrix.* DIMACS Workshop on Phase Transitions in Random Structures and Algorithms. Georgia Institute of Technology.

01/2007 *Correlation decay and counting list-colorings of a graph*, Symposium on Discrete Algorithms (SODA2007). New Orlean, LA.

12/2006 *Undecidability results in the theory of queueing networks.* Bertinoro Workshop on Adversarial Modeling and Analysis of Communication Networks.

11/2006 *Steady-state analysis of a multi-server queueing system in QED regime.* INFORMS.

10/2006 *Correlation decay in statistical physics and applications to counting problems.* DIMACS Workshop on Properties of Large Graphs: From Combinatorics to Statistical Physics and Back.

06/2006 *Correlation Decay in Statistical Physics and Applications to Counting Problems*, SIAM Conference on Discrete Mathematics, University of Victoria, Victoria, BC.

06/2006 *Spatial decay of correlations and efficient methods for computing partition functions*, Conference on Stochastic Networks 2006, invited presentation. University of Illinois at Urbana-Champaign.

01/2006 *Counting without sampling New algorithms for enumeration problems using statistical physics*, Symposium on Discrete Algorithms (SODA2006). Miami, FL.

10/2005 *Exponential Ergodicity in Multi-Class Queueing Networks*, INFORMS 2005, San-Francisco, CA.

07/2005 *Validity of Steady-State Heavy Traffic Approximations in Generalized Jackson Networks*, 13th INFORMS/Applied Probability Society Conference, Ottawa, Canada.

07/2005 *Exponential Ergodicity in Multi-Class Queueing Networks*, 13th INFORMS/Applied Probability Society Conference, Ottawa, Canada.

07/2005 *Counting without sampling New algorithms for enumeration problems using statistical physics*, 13th INFORMS/Applied Probability Society Conference, Ottawa, Canada.

03/2005 *Applications of the local weak convergence method to random graph problems*, MSRI Workshop of Phase Transition and Reconstruction Problems. Berkeley, CA.

01/2005 *The Expected Value of a Random Minimum Length Spanning Tree of a Complete Graphs*, Symposium on Discrete Algorithms (SODA2005). Vancouver, BC.

10/2004 *Validity of Heavy Traffic Steady-State Approximations in Open Queueing Networks*, INFORMS 2004, Denver, CO.

08/2004 *Maximum Weight Independent Sets and Matchings in Sparse Random Graphs*, Approx-Random 2004 workshop, Harvard University, Cambridge, MA.

07/2004 *Large Deviations Principle in Constrained Homogeneous Random Walks and Queueing Systems*, 12th INFORMS/Applied Probability Society Conference, Beijing, China.

07/2004 *Stochastic Online Bin Packing Problem*, 12th INFORMS/Applied Probability Society Conference, Beijing, China.

06/2004 *Asymptotic Optimality of the Transposition Rule in Linear Lists*, Mathematical Modeling and Analysis workshop, New York, NY.

01/2004 *Linear Phase Transition in Random Linear Constraint Satisfaction Problem*, Symposium on Discrete Algorithms (SODA2004). New Orleans, LA.

10/2003 *Weak Instability in Stochastic and Fluid Queueing Networks*, INFORMS 2003, Atlanta, GA.

09/2003 *Linear Phase Transition in Random Linear Constraint Satisfaction Problem*, Discrete Random Walk: Theory and Applications, Institute Henri Poincare, Paris, France.

05/2003 *Weak Instability in Stochastic and Fluid Queueing Networks*, Mathematical Modeling and Analysis workshop, San Diego, CA.

09/2002 *The Diameter of a Long-Range Percolation Graph*, "Algorithms, Trees, Combinatorics and Probability" Colloquium, University of Versailles, France.

01/2002 *The Diameter of a Long-Range Percolation Graph*, Symposium on Discrete Algorithms (SODA2002). San-Francisco, CA.

07/2001 *Computing Fluid Limits and Stationary Distributions for Constrained Random Walks and Queueing Systems*, 11th INFORMS/Applied Probability Society Conference, New York, NY.

07/2001 *Stochastic Online Bin Packing Problem: Exact Conditions for Stability under the Best Fit Heuristic*, 11th INFORMS/Applied Probability Society Conference, New York, NY.

07/2001 *Static and Dynamic Packet Routing in Communications Networks*, 11th INFORMS/Applied Probability Society Conference, New York, NY.

06/2001 *Stochastic Online Bin Packing Problem: Exact Conditions for Stability under the Best Fit Heuristic*, Mathematical Performance Modeling and Analysis workshop. Cambridge, MA.

12/2000 *Performance of Multiclass Markovian Queueing Networks via Piecewise Linear Lyapunov Functions*, Conference on Decision and Control. Invited presentation. Sydney, Australia.

12/2000 *Static and Dynamic Packet Routing in Communications Networks*, INFORMS. Invited presentation. San-Antonio, TX.

06/2000 *Performance of Multiclass Markovian Queueing Networks via Piecewise Linear Lyapunov Functions*, Conference on Stochastic Networks. Madison,WI.

06/2000 *On Deciding Stability of Constrained Homogeneous Random Walks and Queueing Systems*, Mathematical Performance Modeling and Analysis workshop. Santa Jose, CA.

02/2000 *On Deciding Stability of Scheduling Policies in Queueing systems*, Symposium on Discrete Algorithms (SODA2000). San-Francisco, CA.

12/1999 *Asymptotically Optimal Algorithm for Job Shop Scheduling*, Conference on Decision and Control. Invited presentation. Phoenix, AZ.

10/1999 *On Deciding Stability of Scheduling Policies in Queueing Systems*, INFORMS. Invited presentation. Philadelphia, PA.

07/1999 *Performance Analysis of Multiclass Markovian Queueing Networks*, Conference on Applied Probability, Ulm, Germany.

07/1999 *Extension of the PAC Framework to Finite and Countable Markov Chains*, 12-th Annual Conference on Computational Learning Theory, U of Santa Cruz, CA.

05/1999 *Performance Analysis of Multiclass Markovian Queueing Networks*, Mathematical Performance Modeling and Analysis workshop. Invited presentation. Atlanta, GA.

05/1999 *Stability of Adaptive and Non-Adaptive Packet Routing Policies in Adversarial Queueing Networks.* Proc. 31st ACM Symposium on Theory of Computing (STOC1999). Atlanta, GA.

10/1998 *Stability of Adversarial Queues via Fluid Models*, 29th IEEE Conf. on Foundations of Computer Science (FOCS1998). San-Francisco, CA.

07/1998 *Efficient Learning of Monotone Concepts via Quadratic Optimization*, 11-th Annual Conference on Computational Learning Theory. Madison, WI.

07/1997 *Estimation of Time-Varying Parameters in Statistical Models: An Optimization Approach*,10-th Annual Conference on Computational Learning Theory. Nashville, TN.

08/1995 *Stability Conditions for Multiclass Fluid Queueing Networks under Priority and FIFO policies*, Stochastic Networks Workshop. Edinburgh,UK.

06/1995 *Stability Conditions for Multiclass Fluid Queueing Networks*, Conference on Applied Probability, Atlanta, GA.
